ABSTRACT

This annotated catalog of resources is designed to help elementary school teachers in Alberta, Canada select resources to be used in teaching the province's social studies program. The social studies program is organized around a focus area and three topics for each grade. The focus areas are: Grade 1, Me and Others; Grade 2, People Today; Grade 3, Communities; Grade 4, Alberta; Grade 5, Canada; and Grade 6, Meeting Human Needs. Resources are grouped in two categories: Basic and Support (formerly called Recommended and Supplementary). Basic resources are those authorized as the most appropriate for addressing the majority of learner expectations; support resources are those authorized to assist in addressing some learner expectations of a course, a course component, or across grades. Listed resources include print, computer courseware, kits, maps, atlases, globes, video cassettes, and teaching resources. Appendices identify lists of teaching resources produced by Alberta Education, additional teaching resources, suppliers, regional offices of education, and media centers. A format index, a series index, and a title index are also included. (DB)

Authorization of Resources

Alberta Education currently identifies the best resources for learning and teaching by authorizing them as Basic or Support resources. These resources are authorized as the most appropriate for courses or programs of study. They meet Alberta Education's criteria for acceptability, including:

- criteria for curriculum fit and instructional design
- criteria for tolerance and understanding
- developmental analysis
- physical considerations
- cost
- Canadian content.

Categories of Authorized Resources

There are two categories of authorized resources.

Basic Basic resources are those authorized as the most appropriate for addressing the majority of learner expectations of course(s), substantial components of course(s), or the most appropriate for meeting general learner expectations across two or more grades, subject areas or programs as outlined in provincial programs of study. These may include any resource format, such as print, computer software, manipulatives or video cassette.

Support Support resources are those authorized to assist in addressing some of the learner expectations of course(s) or components of course(s), or to assist in meeting the learner expectations across two or more grades, subject areas or programs as outlined in the provincial programs of study.

Please note that resources previously authorized as "Recommended" and "Supplementary" are now listed as "Support."

As a guideline, two or three items or series per topic are authorized as Basic for social studies instruction in each grade. Two to six items or series are authorized as Support for each topic at each grade. Student learning and teaching resources, whenever possible, remain authorized for a minimum of five years.

Authorization of Resources

Other Resources

The School Act (1990) indicates that a school board may develop or acquire instructional materials for use in programs or in schools. Selection of instructional resources is not restricted to those authorized by Alberta Education. For example, additional video cassettes and other non-print resources are available through the agencies listed below.
